Re.: La Paloma Winery, Project PN 3.879.0004, Clovis USGS Quadrangle, Fresno County

Dear Ms. DePietro,

A record search of the Native American Heritage Commission (NAHC) *Sacred Lands File* was completed for your project area with negative results, based on the USGS quadrangle information you provided. Please note that the absence of specific site information in the *Sacred Lands File* does not indicate the absence of Native American cultural resources in any APE. Other sources of cultural resources information should be contacted regarding known and recorded sites.

Please contact all of the people on the attached list. The list should provide a starting place to locate areas of potential adverse impact within the APE. I suggest you contact all of those listed, if they cannot supply information, they might recommend others with specific knowledge. By contacting all those on the list, your organization will be better able to respond to claims of failure to consult. If a response has not been received within two weeks of notification, the NAHC requests that you follow-up with a telephone call to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from any of these individuals or groups, please notify me. With your assistance we are able to assure that our lists contain current information. If you have any questions or need additional information, please contact me at my email address: rw_nahc@pacbell.net.

Sincerely,

A handwritten signature in cursive script, appearing to read "Rob Wood".

Subject: Proposed Demolition at the Former La Paloma Winery , City of Clovis, Fresno County

Dear Bob Pennell,

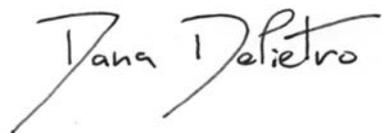

The project involves the demolition of the former La Paloma Winery, which sits on an approximately 16.56-acre parcel east of Clovis Avenue and north of Dakota Avenue in the City of Clovis, Fresno County, California. The City of Clovis intends to demolish most of the buildings on the project site with the exception of the distillery building (Building 1), Building 4, and the tower (Building 3), which the City intends to preserve for potential future re-use. The City also intends to clear overgrown vegetation and remove debris that has accumulated on the project site. The project site has become an attractive nuisance and many of the buildings are crumbling and a potential safety hazard. The City wishes to clear these dangerous buildings and secure the site so that it is not a safety hazard. There are no existing development plans for the re-use of the project site. In the future, if the City is presented with plans for re-use the potential re-use of the project site would be subject to further environmental review. The proposed project area is depicted on the attached map. The project area was surveyed on August 14, 2015. During the course of the survey, no additional historic prehistoric sites were found. A records search conducted at the Southern San Joaquin Valley Information Center (SSJVIC) at California State University, Bakersfield also indicated that aside from the winery and nearby Tarpy Depot, no historic or prehistoric sites have been recorded within a .5 mile radius of the project area.

Consultation

The NAHC response letter indicated that there may be additional information to be gained from individual tribal members and/or tribal organizations. FCS is sending this letter to give you the opportunity to provide any additional knowledge you may have about the project area and to provide you with an opportunity for consultation about the proposed project. Because public involvement is a key ingredient in successful consultation, we are soliciting your input as part of California Environmental Quality Act (CEQA) process.

Please feel free to contact me at 925.357.2562 or via email at ddepietro@fcs-intl.com if you have any questions or would like to discuss the project in more detail.

Sincerely,

Lorrie Planas
2736 Palo Alto, Clovis, CA 93611

Subject: Proposed Demolition at the Former La Paloma Winery , City of Clovis, Fresno County

Dear Lorrie Planas,

The project involves the demolition of the former La Paloma Winery, which sits on an approximately 16.56-acre parcel east of Clovis Avenue and north of Dakota Avenue in the City of Clovis, Fresno County, California. The City of Clovis intends to demolish most of the buildings on the project site with the exception of the distillery building (Building 1), Building 4, and the tower (Building 3), which the City intends to preserve for potential future re-use. The City also intends to clear overgrown vegetation and remove debris that has accumulated on the project site. The project site has become an attractive nuisance and many of the buildings are crumbling and a potential safety hazard. The City wishes to clear these dangerous buildings and secure the site so that it is not a safety hazard. There are no existing development plans for the re-use of the project site. In the future, if the City is presented with plans for re-use the potential re-use of the project site would be subject to further environmental review. The proposed project area is depicted on the attached map. The project area was surveyed on August 14, 2015. During the course of the survey, no additional historic prehistoric sites were found. A records search conducted at the Southern San Joaquin Valley Information Center (SSJVIC) at California State University, Bakersfield also indicated that aside from the winery and nearby Tarpry Depot, no historic or prehistoric sites have been recorded within a .5 mile radius of the project area.

Consultation

The NAHC response letter indicated that there may be additional information to be gained from individual tribal members and/or tribal organizations. FCS is sending this letter to give you the opportunity to provide any additional knowledge you may have about the project area and to provide you with an opportunity for consultation about the proposed project. Because public involvement is a key ingredient in successful consultation, we are soliciting your input as part of California Environmental Quality Act (CEQA) process.
